

GESTALT & NEUROSCIENCE

Bridging the Gap from Neurone to Presence

ONLINE | 14 & 21 MAY 2025 (9AM TO 12PM)

DOUGLAS SHARP

The Practicums are designed for Therapists, Supervisors, & OD practitioners.

Gestalt theory and practice can be illuminated by the light of neuroscience. If you are like me, you will wonder how Gestalt concepts of Presence, Here & Now Orienting, Figure / Ground, and Phenomenology can be understood & enhanced through neuroscience.

We will examine research, theory, and practice, using neuroscience lenses, and we will be informed by the research of:

Jaak Panksepp: Mark Solms: Frank Corrigan: Bjorn Merker: Antonio Damasio

Gestalt inquiry is creative, experimental, playful, and group oriented, so please come and practise your relational art.

The greatest scientists are artists as well – Albert Einstein

Venue: Online

Dates: 14 & 21 MAY 2025
(9AM TO 12PM)

Cost: £99

Douglas Sharp
